

Offering patients a customized laser cataract procedure with outstanding precision.

The CATALYS® Laser Cataract Procedure

- Customized treatment with advanced 3D imaging
- Laser precise treatment
- Gentle approach to surgery
- Normal recovery

Ask your physician if the CATALYS® Laser procedure is right for you.

INDICATION

The CATALYS® Precision Laser System is indicated for use in patients undergoing cataract surgery for removal of the crystalline lens. Intended uses in cataract surgery include anterior capsulotomy, phacofragmentation, and the creation of single plane and multi-plane arc cuts/incisions in the cornea, each of which may be performed either individually or consecutively during the same procedure.

CONTRAINDICATIONS

The CATALYS® System should not be used if you are not a candidate for cataract surgery, have certain pre-existing corneal problems or eye implants; or if you are younger than 22 years of age. Tell your doctor about any eye-related conditions, injuries, or surgeries.

PRECAUTIONS

Patients must be able to lie flat on their backs and motionless during the procedure. Patients must be able to tolerate local or topical anesthesia. Tell your doctor if you are taking any medications such as alpha blockers (like Flomax® to treat an enlarged prostate) as these medications may affect how the doctor does the cataract surgery.

ADVERSE EFFECTS

Complications associated with the CATALYS® System include mild broken blood vessels or redness on the white part of your eye, which may last for a few weeks. Other potential risks associated with cataract surgery may occur. These risks may include but are not limited to corneal swelling and/or abrasion, lens capsular tear, infection, inflammation, eye discomfort, reduced vision. Talk to your doctor regarding all the potential risks associated with these procedures.

CAUTION

Federal law (USA) restricts this device to sale by or on the order of a physician.
